

Degree Programme in Medicine and Surgery

The degree programme in **Medicine and Surgery** at Humanitas University **lasts 6 years and is taught in English.** You will meet up with **students from over 20 countries worldwide.** After obtaining your degree in Medicine, you will be able to sit the state exam to enrol in the professional register and take the exam to enter a Medical Specialty School. From the very first year, theoretical and practical competences can be acquired thanks to the multidisciplinary modules combined with **practical training and simulations**, under the guidance of professors, researchers with international experience – including 3 Noble Prize Winners – and 150 doctors, who also work as tutors and members of the teaching community.

An International Advisory Board supports the University in its education and training goals. Starting from the third year you will start your **clinical training at the various** **y**

Nursing Degree Programme

Physiotherapy Degree Programme

The Nursing Degree at Humanitas University, taught in Italian, is a three-year degree programme, qualifying you to work in hospitals, in the community, in clinics and in care homes. Students can acquire both theoretical and practical competences thanks to the integration of teaching and learning activities with **clinical practice training in Humanitas hospitals and affiliated structures**.

There is a strong emphasis on the development and **application of scientific research skills for nursing practice and the final thesis**.

The degree programme is available in Milan and at the Gavezzani hospital in Bergamo.

The Physiotherapy Degree

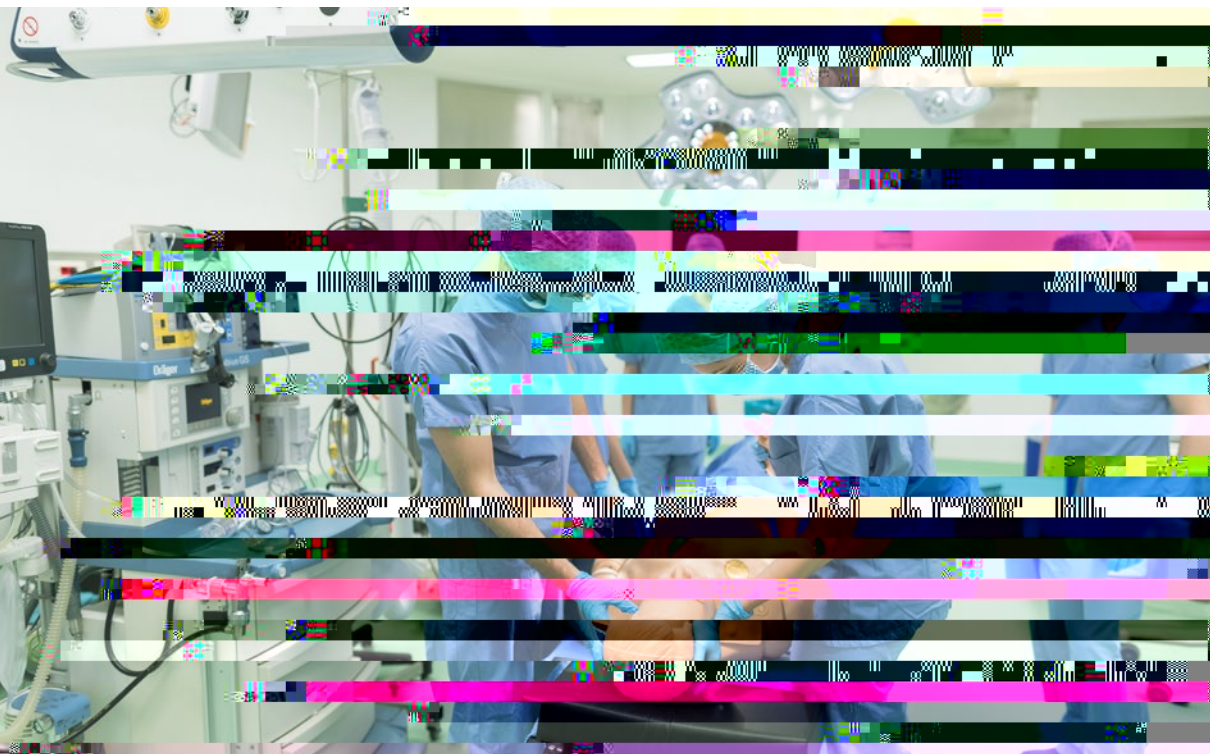

MedTec School

MEDTEC School is the new international **degree programme in Medicine designed and developed by Humanitas University and the Politecnico di Milano**. The new degree aims to integrate and strengthen the skills of the professional figure of the medical doctor with the skills relevant to Biomedical Engineering. On completion of the study programme, **medical graduates** can apply to the **Politecnico di Milano** for

The Simulation Center

The Mario Luzzatto Simulation Centre is a 2000 square metres state-of-the-art Simulation Lab, **one of the largest and most technologically advanced in Europe** which complements the academic teaching and learning activities to train healthcare professionals. The **first in Italy to integrate a hospital, a university campus, a simulation centre and a wet lab** to provide an outstanding experience.

It is available for students, residents and healthcare professionals to develop professional skills and competences to integrate theoretical knowledge with practical skills thanks to its emergency room, operating theatres, ambulatories, clinical and surgical skill rooms, microscopic labs and multimedia booths.

Humanitas is an **international hub** for the training of doctors, nurses, physiotherapists and researcher capable of dealing with future
