The Mario Luzzatto Simulation Centre

which complements the academic teaching and learning activities to train healthcare proyo /Spm6s.

**T**he Campus, built in 2017, brings everything together in one place – lecture halls and rooms, the Simulation Centre, the Hospital, the Research Centre and the Student House. Humanitas University lets you make the most of your university experience.

Humanitas University is

Becoming a medical doctor means:

- Acquiring professional knowledge over the course of time ( )
- Developing solid
- Learning to and interact with patients and their family members.

From the 3rd year you will start your training in Humanitas hospitals.

Currently in Italy, after obtaining your degree in Medicine and having enrolled in the professional register, you must complete a residency to work in a hospital or clinic. To facilitate your choice of post-graduate training, we have introduced a number of curricular and extracurricular initiatives, including:

in Italy and in the United States. In particular, our "USMLE and more" programme has been designed for those medical students who are interested in continuing their education in the US and for those who want to test the skills they have acquired against an international benchmark

to learn more about post-graduate opportunities.
